Notes.—(*a*) The above rates include porterage by the Port Trust except in the case of any of the following items:—Coal, coke, manganese ore, magnesite, dynamite, explosives, firewood, asbestos in cases, kerosene in tins, empty oil cases, redwood, timber, and all goods landed outside the harbour. If timber is landed on a pier for carriage into the Trust's yard, porterage at the rate of Rs 1-8-0 per 50 cubic feet must be paid; but the Trust takes no responsibility for timber so landed—any more than for other timber. For empty oil cases of other sizes than 8 gallon the rate will be altered proportionately.

(*b*) For all Government stores—except explosives, spoons, coal, coke and timber for which rates are shown in the above schedule—a uniform rate will be charged, inclusive of cranage, of Rs. 2 per ton of 50 cubic feet or 20 cwt.

(*c*) If the aggregate of all charges payable in respect of any one consignment shall amount to less than 4 annas, a minimum charge of 4 annas will be levied.

(*d*) As long as the Port Trust relinquishes the porterage of *non-dutiable*, *dead-landed*, *empting cases*, the rates for harbour dues on such cargo will be Ar. 3 less than those given in the above schedule. The reduction will not, however, apply to goods landed outside the harbour, or to Government consignments, coal, coke, magnesite, timber, redwood or firewood, if landed inside the harbour.

(*e*) The schedule rates for motor bicycles, motor cars, carriages and traverse cover cranage on landing or shipment, and will apply also to returns after failure to ship.

(*f*) No dues will be charged on *bond fide* "apparel and effects" or "personal effects," accompanying passengers, as their own personal baggage. But this exception does not extend to troops.

OTHER SERVICES WHICH THE BOARD MAY PERFORM FOR THE PUBLIC

1. STORAGE—*Ordinary*.—Exclusive of the days of shipment, landing and delivery, and also of Sundays and Chamber of Commerce holidays, three days will be allowed free from the date of landing or deposit at any wharf, pier, dock, land or building in the possession or occupation of the Board. After the expiration of these three free days, no further allowance will be made for Sundays or holidays, and the rate for storage for the first week or portion thereof will be one-fourth of the rate given in the above scale for each article. For the second week or portion thereof double the rate for the first week will be charged. For the third week or portion thereof and thereafter for each week or portion thereof, treble the rate for the first week will be charged. Half storage rates will be charged if goods are stored in the open without covering either of tarpaulin or roof. For goods stored by the Board in its crane yard the three free days begin only on the day after the sailing of the vessel in which they have arrived.

2. STORAGE—*Special*.—A charge of Rs. 5 *per annum* per 2,400 square feet will be levied for the storage of bulky goods, such as coal, coke, minerals, timber, iron, firewood, redwood, glass, etc., on application made in writing previous to deposit at any wharf, pier, dock or land in the possession or occupation of the Board. This reduced rate will be levied per calendar month or portion thereof, and a part of 2,400 square feet for part of a month will be reckoned as a full 2,400 square feet for a full month. All goods so stored at this reduced rate will be at the risk of the owners, the Trustees merely renting the space to owners by the month. In applying for leave so to store goods, owners must state that, in consideration of the reduced rate, they accept all risks and responsibility. In the absence of such a statement, *ordinary* storage rates will be levied, as given above in paragraph 1.

3. STORAGE *of Iron and Steel*.—After allowing for such free days as the Board may see fit to grant, the following charges will be made for storage of the undelivered balances of consignees' consignments, as worked out from day to day:—

During the first month	.. ..	¼ pie per ton per day.
" second month	.. ..	1 anna " "
" third "	.. ..	2 annas " "
" fourth and subsequent months	.. ..	4 " " "

Note.—The months will count from the date on which the steamer begins to discharge her cargo.

4. CRANAGE.—For the cranage of goods at any wharf, pier, dock, land or building in the possession or occupation of the Board.—for each package, chargeable by weight or measurement:

		Rs.	A.	P.	
Up to ½ a ton at the rate of	.. ..	0	4	0	per ton per hour.
Over ½ ton and up to 1 ton at the rate of	.. ..	0	8	0	" "
Over 1 ton and up to 2 tons "	.. .. ..	1	8	0	" "
Over 2 tons and up to 5 tons "	.. .. ..	2	8	0	" "
Over 5 tons and up to 10 tons "	.. ..	4	8	0	" "
Over 10 tons and up to 15 tons "	.. .. ..	6	0	0	" "
Over 15 tons at the rate of	.. ..	8	0	0	" "

Note.—These rates do not apply to Government stores except explosives, spoils, coal, coke and timber.

5. HAULAGE—*Haulage of railway vehicles carrying goods to or from, or entering upon, any pier, dock, land or building in the possession or occupation of the Board*.—For each loaded vehicle, moved by the Board's engines or coolies, two annas per trip per ton carried, or in the case of coal, per ton of marked waggon capacity. When not so moved the charge for entry of vehicles will be one anna per trip per ton carried or marked respectively as aforesaid.

But for movement of vehicles over the Board's lines outside the harbour arms the charge will be 3 annas per trip per ton of marked waggon capacity for bulk or encased mineral oil, minerals or stone, or per ton carried of other goods. This 3-anna rate covers full or empty haulage of the vehicles inside and empty haulage outside the harbour arms. But it does not apply to timber, on which, wherever hauled, the 2-anna rate only is payable.

6. LOADING OR UNLOADING.—Into or from railways or other vehicles by hand labour, annas 2 per ton.

7. TRANSHIPMENT, ETC.—Upon goods manifested for transhipment, if landed and re-shipped, cranage will only be paid upon re-shipment. When transhipped from ship to ship, half harbour dues only will be charged. If the tonnage of goods so transhipped cannot be ascertained, dues will be levied upon the registered tonnage of the lighter or other craft conveying them. Seamen's effects and ships' fittings will be passed free. Coal and petroleum fuel which has paid dues on landing will be re-shipped free. When goods or water born for shipment, but not shipped, a refund of dues, other than cranage, will be made, provided the refund is claimed within fourteen days from date of short shipment.

DEPARTMENT OF COMMERCE AND INDUSTRY.

TELEGRAPH ESTABLISHMENT.

No. 5251-5252-87.

Simla, the 4th June 1908

RESOLUTION.—By the Government of India, Department of Commerce and Industry.

In a resolution No. 3569-3873, dated the 22nd April 1908, the Government of India appointed a Committee to examine and report on the working of the new arrangement of the hours of duty in the Indian Telegraph Department, which was introduced on the 1st April 1903.

2. The Report of the Committee has now been received and is appended to this Resolution. The Committee have satisfied themselves that while modifications in detail are necessary, owing to the trying character of night work in India, the principle on which the new arrangement of hours is based is sound and workable, and the arrangement itself is a great improvement on the former system. The revised scheme of duties therefore, which the Committee recommend, retains the 50 hours week as the basis of the system, but provides that six hours of night work shall be treated as eight hours and that, in the case of a period of duty performed partly by night and partly by day, seven hours shall count as eight hours.

3. The Government of India accept the recommendations of the Committee. In the case of the offices visited by them detailed proposals for the arrangements of the hours of work have been made and these will be brought into force at once. In the case of other first-class offices, the Director-General of Telegraphs will take immediate steps to have duty-charts drawn up on the same principles.

4. The inquiries of the Committee were conducted in close communication with the members of the signalling establishment of seven of the principal telegraph offices of India and Burma, and the Government of India notice with pleasure that the staff has in every instance accepted the conclusions unanimously arrived at by the Committee. They desire to acknowledge the thorough and careful manner in which the work of the Committee has been done; and they believe that the new system, as modified by the Committee, will be found to be a great improvement on the former system both as regards the comfort of the staff and the prompt disposal of traffic.

Ordered, that a copy of this Resolution be forwarded to the Director-General of Telegraphs for necessary action, and that it be published in the *Gazette of India*.

REPORT OF COMMITTEE APPOINTED BY RESOLUTION No. 3869-3873, DATED THE 22ND APRIL 1908, TO ENQUIRE INTO HOURS OF DUTY IN THE TELEGRAPH DEPARTMENT.

Introduction.—In compliance with the instructions conveyed in the Resolution of the Government of India in the Department of Commerce and Industry, No 3869-3873, dated the 22nd April 1908, we have examined the working of the new arrangement of the hours of duty in the Telegraph Department and beg to submit the following report.

2. *Tours of Committee and method of enquiry.*—We commenced the enquiry on the 24th April and completed it on the 28th May, and during this period we visited the principal telegraph offices of the country in the order in which they are shown in the margin. As directed in the Government Resolution, a member of the local staff selected by the Superintendent in consultation with the men, was associated with us at each centre and these officials were of the greatest assistance to us in our enquiries. Full opportunity was given to the staff to submit any representations, written or verbal, which they desired to make, and about 70 of the men appeared before us at the several places and in a reasonable spirit acquainted us with their views, in addition to which printed statements of their case were handed to us by the staff at Madras, Allahabad, Rangoon and Lahore. The results of our enquiries at the different centres visited are embodied in separate memoranda, signed in each case by the local official who served on the Committee as well as by ourselves.

3. *Brief description of scheme under enquiry.*—The scheme of duties under examination is based on the principle of dividing the staff of an office into small sets with equal periods of duty and arranging their hours of attendance with the object of ensuring that the number of men at work shall, at all times of the day and night, be proportionate to the actual amount of traffic. With proper supervision, therefore, it makes for the utmost efficiency and expedition in the disposal of traffic, while it has the important result of reducing to a minimum the proportion of the staff required for duty at night, when work is lightest. The duties of the several sets can readily be re-adjusted to suit variations in the traffic without disorganising the arrangements in the office, and a salient feature of this system is its elasticity and adaptability to any conditions. It thus enables the establishment of an office to be utilised to the best advantage, so that with the same staff a much larger pattern of work may be secured than was possible under the old system. Moreover, not the least favourable effect of the new system is that it introduces as much regularity as it is found possible to provide in the times for duty and rest for the staff by giving all the men a turn of each period of duty for 6 days in succession, instead of the constant harassing changes to which the men were subject formerly.

4. *Short account of watch system.*—Under the old system, the staff of an office was divided into 3 sets or watches, approximately of equal strength, which worked in rotation. In some offices "special" or fixed daily duties were assigned to a small proportion of the staff, but the three main duties, in the order in which they rotated for each set of men, were as follows :—

1st day	.. ..	8 A.M. to 4 P.M.	.. 8 hours.
2nd day	.. ..	9 P.M. to 8 A.M.	.. 11 "
3rd day	.. ..	4 P.M. to 9 P.M.	.. 5 "

and so on every day in succession including Sundays. In addition, therefore, to the hours of attendance changing daily, the periods of duty and rest were very unequal. A term of attendance extending to 11 hours, during which the signallers were ordinarily permitted to sleep for 3 or 4 hours, occurred every third night and was succeeded by an interval of only 8 hours' relief, from 8 A.M. to 4 P.M., during which it was difficult for the men to get proper rest. The system, moreover, was not well adapted to the conditions of traffic, which, though fairly constant in volume at the same hours from day to day, fluctuates greatly during the different hours of the same day. It thus happened that the force on night duty was in excess of actual requirements, while that on duty during the busiest portion of the day was usually inadequate to cope with the traffic, with the result that much of it was delayed and left over for disposal at night.

5. *Recommendation for permanent retention of new system.*—For these reasons, we are unanimously of opinion that the new system of arranging the hours of duty is thoroughly sound in principle, is undoubtedly superior to the old system of watches and should be maintained permanently, with the modifications which will shortly be explained.

6. *Objections of staff to new system.*—Turning now to the objections on the part of the staff to the scheme recently introduced, we found that they were at root the same everywhere and related chiefly to the uniform period of 8 hours which had been fixed for all duties, whether by night or by day. It was urged that 8 hours' continuous duty, rendered wholly or in great part by night, is excessive, especially when performed on 6 consecutive nights, and it was also represented that the duties from 14 to 23 and 15 to 23 hours are very exacting, including as they do, the busiest and most exhausting time of the day, viz., the afternoon and evening, and extending well into the night. In connection with the latter term of duty it appeared further that the men relieved at 23 hours find it difficult to get to their homes, particularly in the large cities. The officers of the Telegraph Department, whom we consulted, confirmed the statements of the staff on these points, and we may say at once that we are fully satisfied that substantial grounds exist for the representations made.

7. *Suggestions of staff.*—While these objections were consistently brought to our notice at every stage of our enquiry, the staff of the different offices were by no means of one opinion as to the remedy that should be adopted. We need not refer to all the various suggestions which we received, as many of them were obviously unpracticable and few were seriously pressed. We may mention, however, that at Bombay, we were asked to recommend the adoption of the 8 hours' watch system which is in force in the office of the Eastern Telegraph Cable Company there, but, as will be seen from the memorandum of our proceedings at that place, the system is wholly unsuited for Government Telegraph Offices, where the conditions of traffic are entirely different from those in the Eastern Telegraph Cable Company's Office. A feeling also existed at some offices in favour of a daily, instead

of a weekly rotation of duties, but this practically involved a reversion to the old system and the idea was abandoned, when we pointed out the intrinsic advantages of a weekly system of regular periods of duty and rest and explained how the new duties could be modified to meet the special difficulties in connection with night work which the staff are experiencing.

8. *Modifications in new scheme proposed by Committee.*—As already observed, we are convinced of the necessity for introducing some modifications in the terms of duty now fixed and the question of the actual changes to be made has received our careful consideration. Regarding continuous night duty, we have made enquiries from many officers of the Telegraph Department, and privately, from various other persons unconnected with that department who were qualified to speak on the subject, and the almost unanimous opinion of these consulted is that 8 hours would be a reasonable term for such duty. We fully share this view and recommend that the period of continuous night duty should be fixed at 6 hours. As regards duties which are performed to any considerable extent by night, the conclusion at which we have arrived is that 7 hours would be a suitable term to fix. Our complete proposals for regulating the periods of duty are —

(1) that *6 hours* should be the duration of all duties which commence at or after 5 hours and cease before 21 hours;

(2) that *7 hours* should be the duration of all duties which begin before 13 and also terminate at or after 21 hours or which begin before and end after 5 hours; and

(3) that *6 hours* should be the duration of all duties which commence at or after 13 hours and terminate before 5 hours.

9. *Effect on weekly term of duty.*—These proposals directly raise the question as to the total number of hours which should be considered a week's duty for a signaller. It appears, from a notice, dated the 23rd March 1908, issued by the Director-General of Telegraphs that the number is at present fixed at 50 hours, being 8 hours for each week day and 2 hours on Sundays, and we propose to retain this figure as the number of hours of work to be required weekly of each signaller, on the understanding that, in calculating the total, the periods of the 7 and 6 hours' duties shall be reckoned as equivalent to 8 hours, and subject also to our remarks below regarding the period of Sunday duty. The amount of actual duty done per week works out, in the case of the offices embraced in our enquiry, approximately to 46 hours, and as this figure will increase as the proportion of men on night duty is reduced, it may fairly be estimated that the average number of hours of duty required under the scheme thus modified will, before long, amount to about 47 hours.

10. *Period of Sunday duty.*—With regard to the amount of Sunday duty to be rendered before overtime becomes admissible, we may observe that, while we propose to retain the existing period of 2 hours, we are entirely in favour of requiring an average attendance of 2 hours per Sunday, calculated over every 4 consecutive Sundays. Thus, if a signaller works for 8 hours on one Sunday, he should be exempted from duty on the following three Sundays, unless his services are absolutely required, in which case he should be paid for overtime. This arrangement involves no increase in the amount payable for overtime and is preferable to a compulsory attendance by the whole staff for 2 hours every Sunday, which has proved inconvenient to the men. It is clearly desirable that as much relaxation as possible should be given to the men on Sunday, and if the proposals for the reduction of Sunday work, which are now under the consideration of Government, are carried into effect, an average attendance of 2 hours by the entire staff will probably suffice to deal with the traffic in most offices, so that overtime should rarely be required on that day. In this connection, it may be added that the 4 chief holidays, viz., Christmas Day, New Year's Day, Good Friday, and the King's Birthday, should be treated as Sundays and that the term of duty on those days should be fixed at 2 hours.

11. *Duty charts.*—Proceeding on the basis of our proposals, we have prepared duty charts for the offices to which our enquiries extended, with the object of shewing how the staff in these offices can be arranged to meet the present requirements of the traffic. We propose to refer to two points connected with these charts, which are of course subject to alteration in the event of a change in the conditions of the traffic—

(1) *Split duties.*—No split duties have been proposed, as we consider it undesirable to require any portion of the signalling staff of the larger offices to attend more than once on the same day. In some of the smaller offices, however, where the work is light, it will probably be found advantageous in the interests both of the staff and of the traffic to allow split duties.

(2) *Night duty.*—If the term of night duty is fixed at 6 hours, as we have proposed, it will be necessary to arrange two duties for the night, one up to, and the other from, about 2 a.m. and some of the men comprising both these sets will thus be obliged to sleep on the office premises. The men themselves like this arrangement, and we consider it unobjectionable and even advantageous. Where signallers have to sleep on the premises, proper sleeping accommodation should of course be provided and this will involve little expenditure or trouble, as the number of men who will be on night duty will not be large and accommodation already exists at many offices. Our duty charts show that the number of men in the two night sets for the offices concerned is 22 per cent. of the total staff and that each signaller will have to perform night duty about two weeks in nine. It will be seen that the second of these duties is in reality a day duty in large part, but we have treated it for practical purposes as a night duty. The manner in which the new system provides for preventing accumulations on working wires by day should keep down at the lowest limit the volume of traffic for disposal by night and with the material reduction in the amount of night work which may be expected to result from the closing of 2nd class offices at 20 hours, instead of 21 hours, it will no doubt be possible to reduce still more appreciably the number of men on night duty and, as a consequence, the frequency with which each man's turn of such duty will recur.

12. *Recommendations applicable to all large offices.*—All our recommendations have been agreed to unanimously by the members of the staff who served on the Committee and by the men who appeared before us at the different centres which we visited. We are satisfied that they will adequately meet the difficulties experienced by the staff at those places in connection with the new arrangement of hours of duty and that they accord with the wishes of the general body of the men, a large number of whom have, in fact, signified their acceptance of these proposals in writing and applied to have them

introduced as early as possible. The offices visited by us include the largest and most important in India, representing nearly two-fifths of the total signalling establishment, and in the circumstances we feel that we can confidently recommend the general adoption throughout the larger telegraph offices in the country of the principles which we have proposed for regulating the periods of duty. These principles, though also applicable in the main to the smaller offices, will probably require some modifications to suit the special local circumstances of such offices.

18. *Military telegraphists.*—We should mention that we considered also the effect of the new duties on military telegraphists, who are largely employed by the Telegraph Department. We had the opportunity of examining representatives of this class of the signalling establishment at Calcutta, Madras, Bombay and Agra, and we enquired into their case at the Lahore Office, where military telegraphists constitute a considerable proportion of the staff. As the result of our investigations, we found that, in so far as their circumstances are different from those of civil signallers, military telegraphists are not affected in any special way by the recent change in the arrangement of duties. The breakfast and dinner times of these men sometimes fall in one period of duty and when this occurs it will be necessary of some offices to allow them two meal reliefs of 20 minutes each in one turn of 8 hours' duty as was the practice under the watch system, instead of one of 30 minutes as now authorised. We may note that as a body military telegraphists appear to be decidedly in favour of the weekly rotation of hours.

19. *Conclusion.*—Finally, we desire to point out that our recommendations involve no departure from the essential principles of the scheme regarding which we have been appointed to enquire. We anticipate the complete realization of the advantages inherent in that scheme and this expectation is confirmed by the fact that our conclusions have been agreed to by the several officers of the Telegraph Department with whom we discussed the subject, as well as by Mr. Newlands. As the duty charts which we have prepared show, our proposals can be given effect to at once without difficulty, and it only remains for us to add that their adoption will necessitate no increase in the existing signalling establishment.

RESOLUTION—By the Government of India, Department of Commerce and Industry.

In the Resolution of the Government of India, No. 3252—3288-3, dated the 27th March 1908, certain proposals for the limitation of telegraph work on Sundays were published for criticism, with the intimation that any replies which might be furnished would be considered at the end of the first week in May. The replies which have been received from Local Governments and private bodies are generally favourable to the proposals; but modifications have, in several cases, been suggested regarding points of detail. The Government of India in passing orders have endeavoured, so far as possible, to bring the scheme into accordance with these suggestions.

2. The orders which the Government of India have now passed are as follows:—

(1) In places where there is more than one office, all offices except the principal one will ordinarily be closed; but in the case of a few of the largest towns, one or two of the minor offices which serve outlying localities will also be open for short periods.

(2) First class offices will remain open from 9 hours to 8 hours as at present, except when the office is in a place where there is more than one office and it is not itself the principal office.

(3) In places where there is only one office, and the office ordinarily observes second class hours, or in places where there is more than one office and the principal office observes second class hours, it will be open in all cases for two hours in the morning (8 to 10), and for two hours in the evening (16 to 18).

(4) In places where there is only one office, the office, if it ordinarily observes third class hours, will be open for one hour only in the morning (8 to 9), and for one hour in the evening (16 to 17).

(5) Inland telegrams at the lowest rate, at present known as deferred, will not be accepted for transmission at any telegraph office on Sundays and the four chief holidays:—viz., Christmas Day, New Year's Day, Good Friday and the King's Birthday.

The Government of India have also approved the following additional proposals which were not mentioned in the Resolution already referred to:—

(6) In cases of public emergency the District Magistrate may require a Telegraph Office to be kept open specially, beyond its ordinary hours of working.

(7) Any member of the public or Government official may procure the despatch of an urgent telegram during the hours when an office is closed, if the terminal office is open or its attention can be gained, by the payment of extra fees. If both the offices of origin and destination are closed the extra fee shall be two rupees, or if only one of them is closed one rupee. The fees will be paid to the telegraphists in the closed offices. A Government official may recover the cost of the extra fees in the same manner as charges for telegrams are recovered at present, submitting the receipt as a voucher.

ORDERED that a copy of this Resolution be forwarded to all Local Governments and Administrations, to all Chambers of Commerce and Trades Associations, to all Departments of the Government of India, and to the Heads of Departments subordinate to the Department of Commerce and Industry.

Ordered, also, that a copy be published in the *Gazette of India*.

ABSTRACT.—Considering it desirable to organize a School Final examination and referring the question to a Committee with the Director of Public Instruction as President for consideration and report.

II

Letter—from the Hon'ble Dr. A. G. BOURNE, Director of Public Instruction
To—the Secretary to Government, Educational Department.
Dated—Ootacamund, the 15th June 1908.

ABSTRACT.—Forwarding the report of the Committee appointed to consider the scheme for the institution of a School Final examination.

ENCLOSURES.

Report on the scheme for the institution of a School Final examination.

In accordance with the request of His Excellency the Governor in Council contained in the order No 212, Educational, dated 20th March 1908, we have carefully considered the scheme for the institution of a School Final examination therein published and have the honour to submit a report upon the whole question.

2. We assembled at Ootacamund on the 19th May 1908 and met every day with the exception of the intervening Sunday, from the 19th to the 29th of that month and then adjourned until the 2nd June to allow of the preparation of a draft report. Certain matters of detail were referred to Sub-Committees for preliminary consideration; but every aspect of the question was exhaustively discussed in full Committee with the result that the following report represents an unanimous opinion.

3. The unsatisfactory nature of the present arrangement whereby practically every secondary school is almost entirely concerned with the preparation of candidates for a University Matriculation examination seems to us to admit of no doubt whatever. It is also perfectly well known that, as observed by the Government, the Upper Secondary examination has, from the first, failed to achieve the objects which it was intended to secure.

4. We are convinced that there is a crying need for improvement in the matter of secondary education; but we are equally certain that unless some greater departure from the present system than that proposed in the scheme before us is made, the practical result will be to substitute one examination for another without any influence for good upon at any rate the majority of schools.

5. Assuming that the University agree to accept a pass in the proposed School Final examination in lieu of one at the Matriculation with the probable proviso that certain subjects have been selected, practically every school will put its pupils through such a course, the School Final examination with the privileges attached to it by the Government will replace the Matriculation examination in the case of pupils to which it is open, there will be the same small list of "passes" and large list of "failures" as heretofore; in short, the net result from an educational point of view will be practically *nil*.

* Published in notification No. 47, dated 20th March 1908, on pages 182 and 183 of Part I-B of the *Fort St. George Gazette*, dated 24th March 1908.

6. With these considerations before us we have formulated a scheme which involves much more radical changes than contemplated in the notification but which, we hope, will be welcomed by all concerned and be considered by His Excellency the Governor in Council as worthy of trial.

7. We approve of the decision to replace the Matriculation examination as an entrance test for Government service by some guarantee that the applicant has gone through a definite course of study in a recognised secondary school; and that during the period which he has spent at such a school he has conducted himself in a satisfactory manner.

8. We are, however, of opinion that any mere examination at the close of his school career, even although such an examination may admit of a much wider range of studies than the present Matriculation examination, will not attain the object in view.

9. The very term "School Final Examination" seems to us to be open to objection and we propose to use the term "School Leaving Certificate" for a certificate that will be granted to a pupil who proposes to leave school. This certificate will present some record of the latter part, at any rate, of the pupil's school career in regard to progress, attainments, character and conduct. It will also show the result of a public examination.

10. It should be open to the recipient of this certificate to return to school with a view to improve his attainments either in depth or extent and thus secure an endorsement upon the certificate that he has so done.

11. It will be for the Government, the University or other agency to determine the intrinsic value of each certificate; but the latter should be of such a nature as to show exactly what subjects any candidate has studied and to discriminate fairly between one candidate and another as to the benefit he has received from a school course.

12. Bearing in mind that one of the main objects of any change in the present system is to prevent a public examination from dominating the school work, we think that the ideal system would be that any examination to which the pupils may be submitted as a condition of the award of the certificate should be held *in situ* in each school, that the examination should be largely oral in character and should be conducted by the staff in collaboration with the Inspector and a member of the central Board.

13. We have carefully considered the feasibility of such local examinations and have come to the conclusion that the difficulties are prohibitive.

14. Such a method of determining the nature of the certificate would undoubtedly give the work done in the school its due prominence; but having been compelled to abandon this method we propose to combine in the certificate the results of a public examination with the opinion of the headmaster and staff checked by the Inspector.

15. We have not overlooked the fact that different headmasters may set very different standards and that there may even be cases of unfair treatment of individual pupils. The latter will, we hope, be few in number and they will in all probability come to light. To ensure a reasonable uniformity of standard the opinion of the headmaster will be expressed by means of marks and these marks will be "moderated" by the marks awarded at the public examination. In this way it will be possible to place the pupils of different schools upon a common footing and at the same time to attach great weight to the opinion of the school staff as to the relative merits of the pupils in any one school.

16. Owing to the existence of a number of secondary schools having the Third Form as the highest and the possibility also of transfer of promising pupils from elementary schools at that stage, it seems most suitable that the certificate should take no account of the school course below the Fourth Form; on the other hand there seems to be no reason against the commencement of the record at that stage. We propose that every pupil on entering a Fourth Form should be provided with a blank certificate to be kept in the custody of the school so long as he remains there.

17. The question as to whether any subjects should be obligatory at the final examination presents much difficulty. In theory if the examination is not to dominate the school course no subject should be compulsory. In practice, however, among the subjects which will and should be studied in every secondary school there are some in which the attainment of a definite standard by all pupils may reasonably be tested at a public examination. It seems unnecessary to defend the inclusion among these of Arithmetic and, so far as boys are concerned at any rate, of English. The question of the inclusion of a modern Indian language gave rise to much discussion; but we finally agreed that a working knowledge of a vernacular should be insisted upon.

18. As for the other subjects which all boys may be expected to study, we think it unnecessary that their attainments in these should be tested at a public examination; and propose that the results of school work "moderated" by the Board, if necessary, should be accepted. The subjects to be treated in this way are Geography, Science, Drawing and Physical Training. The headmaster's opinion as to the attainments in the three first-named subjects will be expressed in the certificate by means of marks; a general remark will be entered with regard to Physical Training and provision will be made in the certificate for the entry of a remark with regard to Manual Training to which many schools will, we hope, pay attention.

19. It will be necessary in the case of the subjects that are to form part of the public examination to define to some extent the scope of the examination but any control exercised over the courses of study in these and other subjects may be left to the department.

20. The syllabus in Arithmetic may be that recently drawn up for use at the University Matriculation. Similarly the scope of the examination in English may be indicated as has been done by the University with the further remark that great weight will be attached to hand-writing and spelling.

21. With regard to an Indian vernacular, since we propose that the same vernacular may also be brought up as an optional subject all that need be insisted upon for all candidates for the certificate is that the examination in it shall include (i) composition and (ii) translation into the vernacular of short and simple sentences or passages of English. In assigning marks great weight will be attached to hand-writing and spelling and to simplicity and directness of expression.

22. No course of studies would merit the name of a secondary education for boys, unless it included the above-named subjects with, perhaps, the exception of English. In practice English will, as an almost universal rule, form a most important part of the course; a boy taking up an Indian classical language in addition to a further study of his own language in combination with the remaining subjects would undoubtedly be receiving secondary education but such a case is unlikely to occur.

23. The case of girls, on the other hand, requires special consideration; and unless they wish to enter the University where it is at present assumed that English must be the common medium of instruction, it seems to us that they should be under no obligation to learn English as a necessary qualification for entry into, for instance, the teaching profession. In their case domestic economy and needlework might take the place of either Science or English or both, if they so wished it.

24. In the case of both boys and girls a course containing the above-mentioned subjects only, must however be considered to be the bare minimum for a secondary course, and it would not be too great a strain upon the mental capacity of the majority to carry their school studies in some of these subjects to a higher stage or to add others.

25. We devoted much time to discussing what other subjects might be thus added. Any of the following subjects may undoubtedly form part (with due regard to the sex of the pupil) of a secondary school course:—

Languages (classical and vernacular), History, Mathematics, Botany,	Physics, Chemistry and Music.

26. There are other subjects of a more technical character which, as they have a more or less educative value of a general nature, besides being suited to local conditions, may, as a matter of course, be included, viz., agriculture and certain subjects of general education developed from a commercial or official point of view such as Book-keeping and Précis-writing.

27. We are agreed that purely industrial subjects, subjects which involve little theoretical knowledge, arts of which the practice may be acquired almost, if not quite as well, without general education as with it, should be excluded. We realize, however, that it is impossible to draw an absolutely hard and fast line, and propose that the Board should be empowered to recognise any other subject when it is satisfied that such subject is efficiently taught as a correlated subject in the school course.

28. The subjects referred to above we place among those termed "optional" in the notification. In our scheme the names of any of these subjects studied in the school should be entered in the certificate in respect of the terms during which they are so studied; and marks should be given under the authority of the headmaster to indicate the proficiency attained.

29. A pupil may at the close of his second term in the VI Form, with the permission of the headmaster, submit himself to public examination: the marks obtained at this examination together with the "moderated" school marks will be shown upon the certificate.

30. We place no arbitrary limit upon the number of subjects that may be brought up, as it would be practically impossible to render them of "equivalent examinational value," even if such an attempt were not opposed to the spirit of the scheme.

31. The certificate itself obviously becomes under this scheme a document of much importance. It should be something like a Service Register in general character and form. Blank certificates should be on sale to managers at the Government Press, the cost being recoverable by them from the pupils. The certificate would remain in the custody of the headmaster until the owner appears at a public examination when it would be sent by him to the Secretary to the Board. Copies of the entries would be kept in the school or better in the Inspector's office so that the certificate could be replaced if accidentally destroyed.

33. As it rests with the headmaster in the first place to judge of the merits of the pupil's school work, his permission to appear for the public examination seems necessary; we therefore propose that no pupil may appear unless his certificate is sent in by the headmaster.

34. So long as he remains at school, a pupil should be able to retrieve his position in regard to industry or regularity. In moderating school marks we therefore propose that no year should be taken into account if the pupil was not promoted at the end of it on account of insufficient progress or attendances. The certificate will, however, always show his history in regard to these as well as other matters.

35. We are agreed that transfers from one school to another are an evil, more particularly so in the later years of school life; but local conditions render it almost necessary to make some provision for them. We consider, however, that each term must be kept in one and the same school, *i.e.*, that no term-certificate can be accepted unless gained at one school.

36. In every case the Board will complete and hand over the certificate to the headmaster who sent it in for transmission to the owner. The certificates sent to each headmaster will be accompanied, if the Board think it necessary, by remarks upon the work of the school.

37. A certificate-holder, who wishes to improve the quality of his certificate, must rejoin some recognized school for at least two terms, and, if the headmaster of that school considers that his further progress warrants it, he will be permitted to reappear at the public examination in any subject or subjects in which he previously appeared. The percentage of marks then obtained together with the additional school marks will be entered in the certificate.

38. At the same time or without reappearing in any subject a certificate-holder may appear in any further subject or subjects, provided that he has studied them for two or more terms in a school recognized as providing suitable instruction in them, and has, in the opinion of the headmaster, made sufficient progress. The percentage of marks obtained together with the school marks will be entered in the certificate.

39. The "private candidate" finds, of course, no place in our scheme; a school-leaving certificate cannot be granted to any one who has not been at school. The University may always examine such a candidate as to his fitness to enter a college or may depute the college to do so. The Government or other agency may value the evidence produced as to his having received suitable instruction.

40. The dates of the public examination must be so fixed as to suit the schools, and if the school year remains as it is at present, December would appear to be the most suitable month.

41. We have discussed the constitution of the Board and are agreed that it should consist partly of officials and partly of non-officials and that the majority of both should have had as much experience of secondary school work as possible. We think that the selection of its members may be left to Government, or that Government may delegate some at any rate of the appointments to the University, if the University wishes to undertake that responsibility.

42. We have considered the possibility of definitely providing for the representation of the various agencies carrying on secondary education and of specific communities; but the difficulty of defining the agencies is almost insuperable, and the representation of any particular community would seem to serve no useful purpose

43. The most striking feature of the system is the absence of any attempt to declare that the pupil has passed or has not passed an examination. A study of the University Matriculation mark-books reveals the fact that an enormous number of the candidates come out near the border line between "pass" and "failure". We fear that a large number of school pupils aim at little more than to do just sufficiently well to cross the border line, at any rate having done so whether at the first, second, third or even subsequent attempt they have hitherto, with the exception of the remarkably few who pass in the first class, been ranked for all purposes as of equal merit and have been equally admitted to the privileges attaching to a matriculate. There is, moreover, very little difference in merit between a large number who pass and a large number who fail.

44. The University, refraining as it naturally and properly does from attempting to control the work of schools, although it has in the most pernicious way dominated the school courses, has not been in a position to do more than fix a border line The grant of a certificate such as we propose will doubtless do much for school education by taking into account the school work.

45. The certificates themselves present a fairly detailed record of a pupil's school work and its results; the function of the proposed Board, so far as individual pupils are concerned, seems to us to end there It will be open to Government or the University to define a border line; but we are strongly of opinion that an arbitrarily fixed border line common to all certificate-holders will fail to secure the full advantage that might accrue from a change of system. We hope that it may be left open to any Government officer in whose hands power of appointment rests to select the best among the applicants for such appointment. This should prove infinitely better than accepting a matriculate, if available, and granting wholesale exemptions to the rules, with little guidance as to the merits of the individuals, in cases where a matriculate is not available.

46. The University, on the other hand, might well, under the circumstances proposed, leave it to the heads of colleges to select after inspection of these certificates and further examination (particularly oral or practical), if they think it desirable, those candidates for admission who appear best fitted for a college course. There will be cases in which the applicant is obviously fit; there will be others where he is obviously unfit, and with regard to the doubtful cases the authorities will under the scheme proposed have infinitely better material upon which to base a decision than they now have when the mere possession of a matriculation certificate generally decides the question.

47. To sum up, we have, while insisting upon a suitable secondary school course, allowed each pupil as much liberty as possible and left to him under the guidance of his school and his parent the responsibility of deciding whether he has done sufficiently well at school to leave it. His aim can never be to merely cross a borderline but to do as well as possible in all respects throughout the course. We have also proposed to place great trust in the schoolmaster and in the college principal; should they appear to be abusing such trust which, we believe, will not be the case, the fact will be manifest, and it will be perfectly easy to discount school marks on the one hand or to prescribe a minimum grade of certificates for entry into a college on the other.

VIII. Supplementary certificate.—(1) If a pupil wishes to improve the certificate thus awarded to him, whether in regard to its quality in one or more subjects already brought up or by bringing up additional subjects under list C, he may go back to the same or any other recognised school and appear at a succeeding examination conducted by the Board in any subject or subjects in which the examination is held.

(2) There shall be no limit to the number of times which a pupil may thus be re-examined.

(3) The fee for the re-examination shall be Rs. 12; if the re-examination be in a subject or subjects in which a pupil has already been examined by the Board, and if otherwise, Rs. 3 for each new subject under list C.

(4) In either case, a further endorsement shall be made on the pupil's original certificate with regard to his progress in a manner similar to that laid down for the entries in the original certificate.

IX. Subsidiary rules.—The Board shall be competent to frame such subsidiary rules as it thinks fit for the estimate of school work done, the conduct of the public examination and other matters connected with the award of certificates subject to the provisions of this scheme.

X. Date from which this scheme is to take effect.—The scheme shall come into force from 1st January 1909 and the first public examination under it shall be held in December 1909,* the school work corresponding to it being confined, as a transitory measure, to the first and second terms of the school year 1909. The school work in connection with the examination of 1910 shall cover four terms and that in connection with the examination of 1911 the full six terms.

* The exact date will be notified hereafter by the Director of Public Instruction.

GOVERNMENT EXAMINATIONS, 1908.

SPECIAL TEST EXAMINATIONS—OCTOBER 1908.

NOTICE TO CANDIDATES FOR THE PRÉCIS-WRITING TEST.

The following instructions are published in order that candidates may know what is expected of them in the test :—

Instructions to Candidates.

The object of a précis is that any one who has not time to read the original correspondence may, by reading the précis, be put in possession of all the leading features of what passed.

2. The candidate should begin by reading the whole of the correspondence carefully through without writing anything, so that he may clearly understand what passed and be in a position to decide what are the main heads under which the important facts should be arranged. He should then read through the paper again marking what is important.

3. The précis should begin with a brief and lucid introduction to the subject under treatment. This should be followed by a narrative in the past tense containing a brief and clear statement of the contents of the correspondence, *not* in the order of the papers nor even necessarily in chronological order, but in *logical* order. An abstract of *every* paper in the correspondence or an index of its contents is not a précis.

4. The merits of a précis are—

(1) to contain all that is important in the correspondence and nothing that is unimportant ;
(2) to present this in a readable and consecutive shape, expressed as intelligently and distinctly as possible ;
(3) to be as brief as is compatible with completeness and clearness ;
(4) to present a strictly accurate and logically connected statement of the contents of the correspondence.

No candidate can expect to pass who omits any one of the most important points ; marks will be deducted if unimportant points are included or if facts are repeated unnecessarily ; *e.g.*, it is not ordinarily necessary to give the date of every paper in the correspondence and the full name and designation of the writer or recipient of every letter ; and if a fact is repeated in different papers it need not generally be noted more than once in the précis.

5. Grammar, spelling, style and handwriting will be considered in assigning marks, but it must be remembered that mere excellence in composition will not compensate for inaccuracy or incompleteness in the presentation of the facts of the correspondence.

Office of the Comr. for Govt. Examinations,
Madras, 8th July 1908.

Commissioner.

2. The sale will take place at the Excise Commissioner's office, Trivandrum, at 2 P.M. on Monday the 20th July 1908/5th Aadi 1083, when intending bidders should be present either in person or by duly authorised agents.

5. The contractor is bound to deliver 25 per cent. more of the quantity for which he bid if required by the Excise Commissioner, before the season closes.

6. In addition to the forfeiture of deposit, the parties who fail to execute the agreement will be held liable for losses that Government may sustain in consequence of their default and shall not be entitled to any profit that may accrue from the resale of the contract.

7. The contract will be put up in such convenient lots or as a whole as may be desirable at the time of the sale.

Quilon	1,25,000

9. The delivery should, after the execution of the agreement, commence from 1st October 1908 corresponding with the 15th Kanny 1084 and be completed before the 30th April 1909. But it is left to the bidders to commence earlier from the 1st Chingom. In all delays, at the discretion of Government, a grace of 30 days may be allowed.

10. The salt should be brought from the Bombay works and loaded in good bags, supplied by the parties, containing one or two Indian maunds and marked with a specially designed seal at their own expense. The machine for sealing will be supplied to them by the Collector of Salt Revenue, Bombay, and the empty bags will be returned to the owners after the salt has been stored.

11. The salt will be received by weight at Alleppey by passing the bags in trucks over the weighbridge and counting 82⅔ English lbs to one Indian maund. At Munambom, Quilon and Trivandrum, weighing machines will be used.

12. The Government of Bombay will not require payment of the salt duty or any other payment except 3 pies per maund. The following rules will regulate the shipment and delivery of salt and must be strictly complied with.

(*a*) On entering into contract the contractors will be furnished with certificates under the signature of the Excise Commissioner specifying the quantities of salt they are authorised to procure for the use of the Government.

(*b*) Duplicates of these certificates will be forwarded by the Excise Commissioner to the Bombay salt authorities.

(*c*) On production of the original certificates the Bombay Government will permit the contractor to export free of duty, but on payment of three pies per maund, as much salt as he is authorised to procure. The quantity shipped in each vessel will be entered in the certificate in the possession of the contractor and in the duplicate and will also be communicated to the Excise Commissioner.

(*d*) The Excise Comptroller will ascertain whether the whole quantity shipped has been landed. In case of any deficiency, the full export duty prevailing at the time of import on the quantity found deficient will be levied. No allowance for wastage except as provided for in clause 13 *infra* will be made.

(*e*) After each shipment has been received, the Excise Commissioner will grant a certificate stating whether the whole quantity shipped has been received or not and, in the latter case, will certify that the full duty that may be in force at the time of import has been received from the shipper upon the deficient quantity.

(*f*) The certificate must be produced before the Bombay authorities within two months at the latest from the date of shipment.

13. The parties are at liberty to transport salt from Bombay either by steamer or by pattamar; if transport by steamer is adopted, actual wastage not exceeding two per cent. will be allowed. But no wastage will, however, be allowed on salt transported by pattamar or other native crafts.

14. Satisfactory security either in Government of India paper or cash to the extent of Rs. (10) ten per 100 maunds will have to be furnished before the contract is entered into, to enable the Excise Commissioner to recover the duty on deficiencies said for the general fulfilment of the contract. Property security will not on any account be accepted.

15. The contract price on the quantity loaded will be paid as each shipment is delivered.

18. Approved samples of Bombay salt in clean white bottles will be exhibited at the time of sale, and only salt quite dry and of the best description as per sample shown at the time of the auction sale will be accepted. It is incumbent on the bidder to produce a sample bottle for each depot in case he proposes to bid for the supply of more than one.

17. On the sample bottles of the successful bidders their seal and the seal of the Excise Commissioner will be placed soon after the sale and forwarded to the respective depots as soon as the agreements are entered into.

18. Any salt found to be inferior to the sample shall be taken over by Government at such reduction of the contract price (not exceeding 50 per cent of the contract price) as may be determined by Government But in case it is not fit for human consumption, the Government will be at liberty to destroy same and recover the import duty from the contractor.

19. When the contract has been satisfactorily carried out the deposits will be returned. But if one contractor takes more than one lot, the deposits will not be returned till all lots are completed.

20. No person that has been convicted by a Criminal Court or has previously been guilty of such breach of the conditions of a contract under the Salt, Opium, Abkari or Tobacco Regulations, as would render him undesirable as a contractor will be allowed to bid in the auction.

21. Purchasers at auction sales or resales shall not be permitted to sell, transfer or sublet their contract at will without the consent of Government.

22. The contractor will have to pay a penalty of R. Rs. (4—4—0) four and annas four per 100 Indian maunds of salt, if he fails to deliver the quantity contracted for by the 30th April 1909, this forfeiture being irrespective and independent of the duty payable for deficient deliveries as per clause 12 (*d*) *supra*.

23. If by default of the contractor after the execution of the agreement, Government are forced to make other arrangements for transporting the requisite quantity of salt, the contractor shall forego the security deposited by him and make good all losses incurred by Government in consequence of such default over and above the penalty leviable under clause 22 *supra*.

24 The Government reserve to themselves the right of rejecting all or any of the bids without assigning a reason or of making such arrangements for the supply of salt as they deem proper in the interest of Government

25. Any money due to Government by the default of the contractor will be realised from his security, freight due to him and his other properties, as if it were arrears of land revenue.

26. If the contractor fails to recoup the security after a portion of it has been otherwise utilised within 15 days of receipt of written notice, he will be considered to have defaulted and the contract will be subject to the same conditions referred to in paragraph 18 *supra*.

27. The transport of salt shall be in conformity with the Salt Rules and Regulations and the Boat, Pier, Tramway and Port Rules of this State as they exist at present or as may be modified from time to time.

28. The loading and unloading of salt should be between 7 A.M. and 6 P.M. only on working days.

29. The consignments of salt will be loaded and weighed only according to the order of their arrival, but on those days when steamers call at the Ports, preference for loading cargo will be given to the steamers and the contractors should put up with any delay that may occur on that account.

30. The Government are not bound to provide storage spaces for stacking the bags of salt landed at the depot before they are weighed but all that is practicable will be done to them.

31. Any further information can be obtained on application to the undersigned.

സാധുകാരണ വിവരണം.

വെടിപൊട്ടുസാധനങ്ങൾകൊണ്ടു ചെയ്യുന്ന കാര്യങ്ങളുടെ കാര്യത്തിൽ പ്രവൃത്തിപ്പാൻ ഇപ്പോഴുള്ള നിബന്ധനയുടെ പോരായ്മയെപ്പറ്റി ഈയിടെ ഉണ്ടായ സംഗതികളാൽ പ്രത്യക്ഷത്തിൽ അറിവായിരിക്കുന്നു. 1884 ലെ ഇന്ത്യൻ വെടിപൊട്ടുസാധന ആക്ട് ഉണ്ടാക്കിയിരിക്കുന്നതു കാര്യം തടുക്കുന്നതിനേക്കാൾ മുമ്പായി ഒരു കുറ്റം ചെയ്തിട്ടുള്ളതായി തെളിയിക്കുന്നതിനുള്ള വ്യവസ്ഥകൾ ചെയ്തിരിക്കുന്നതുകൊണ്ടു ആ ആക്ട് പ്രകാരം യാതൊരു തടവുശിക്ഷയും ചുമത്തുവാൻ പാടില്ല. ഭയമോ ഉപദ്രവമോ ഉണ്ടാക്കുന്ന പിഴയാകുന്ന കഠിനശിക്ഷ. 1874 ലെ ഇന്ത്യൻ ആയുധാ കൈവശം വെക്കുന്നതിനു സംബന്ധിക്കുന്നതാണെങ്കിലും അതിനാൽ ഉദ്ദേശിച്ചിരിക്കുന്ന ശിക്ഷകളുടെയും ഏറ്റവും വലിയതുകളും 6 ാ വെടിപൊട്ടു സാധനങ്ങളും ഉണ്ടാക്കുവാനുള്ള ഒരുക്കങ്ങളുടെ കാര്യത്തിൽ തടസ്സമായ പ്രവൃത്തിപ്പാൻ അതിലെ നിബന്ധനകളുടെ ഉദ്ദേശത്തിന്റെയും ഗതിക്രമത്തിൽ അല്പം മതിയായിട്ടുള്ളതല്ല. വെടിപൊട്ടു സാധനം കൊണ്ടു ദോഷപ്രവൃത്തികൾ ചെയ്യാൻ പ്രോത്സാഹനം ഉണ്ടാക്കുന്ന ആളുകളെ ശിക്ഷിക്കുന്നതിനു ശിക്ഷാനിയമ

അതിൽ നിയമിച്ചിരിക്കുന്നതിനു പുറമെ മേലോപചാരവുമൊന്നുമാത്രമേ ചെയ്യുവാൻ ഉദ്ദേശിക്കുന്നതിനാൽ നിയമിച്ചിട്ടില്ല. എന്നാൽ കാര്യം ചെയ്യുന്നതിലുള്ള വല്ല ക്രിയയും യഥാർത്ഥത്തിൽ ചെയ്യുവാൻ മാത്രമെ ആ നിയമം പറയുകയുള്ളൂ. പക്ഷെ ന്യായരഹിതമായ വിചാരത്തോടുകൂടി പെടിപ്പൊട്ടൽ സാധനങ്ങൾ ഉണ്ടാക്കുകയോ കൈവശം വെക്കുകയോ ചെയ്യുന്നതിനുള്ള വല്ല ശിക്ഷകളും അതിൽ നിയമിച്ചിട്ടില്ല. എന്നു മാത്രമല്ല മറ്റു സംഗതികളിലും ആവശ്യമായ കഠിന ശിക്ഷ കൊടുപ്പാനും നിയമിച്ചതായി കാണുന്നില്ല. ആകയാൽ അനാവശ്യ സംഘങ്ങൾ ചെയ്യുന്ന കൊലകളുടെ കാര്യത്തിൽ പ്രയോഗത്തിനുള്ള പ്രത്യേക ഉദ്ദേശത്തോടുകൂടി നിയമിച്ച 1863 ലെ ഇംഗ്ലീഷ പെടിപ്പൊട്ടൽ സാധന ആക്ടിന്റെ രീതിയിൽ ഒരു ആക്ട് ഇപ്പോഴത്തെ നിസ്സന്ദേഹം പുത്തികരിപ്പാനായിട്ടുണ്ടെന്നു ആവശ്യമാണെന്നു ആലോചനയിൽ ഗവർണർ ജനറൽ വിചാരിക്കുന്നു. ഒരു വിചാരണ സഭയിൽ ഗവർണ്മെന്റിനു നായി ഉണ്ടാക്കിയിരിക്കുന്ന കേസിൽ കൊണ്ടു ജീവനെയോ ഉയലിനെയോ അപകടം വരുത്തുമാറുള്ള ഒരു പെടിപ്പൊട്ടൽ ഉണ്ടാക്കുകയാകട്ടെ അങ്ങിനെ ഒരു പെടിപ്പൊട്ടലുണ്ടാക്കുവാൻ ശ്രമിക്കുകയോ ജീവനെയോ ഉയലിനെയോ അപകടം വരുത്തുവാനുള്ള വിചാരത്തോടുകൂടി വല്ല പെടിപ്പൊട്ടൽസാധനവും ഉണ്ടാക്കുകയോ തന്റെ കൈവശം ഉണ്ടായിരിക്കുകയോ ചെയ്യുകയോ ചെയ്യുന്ന വല്ല ആളെയും ശിക്ഷിപ്പാനായി നിയമിച്ചിരിക്കുന്നു. എന്നാൽ മാത്രമല്ല ന്യായമായ വല്ല കാര്യത്തിനുവല്ലാതെ മറ്റു വല്ല കാര്യത്തിനും വെടിപ്പൊട്ടൽ സാധനങ്ങൾ ഉണ്ടാക്കുകയോ കൈവശം വെക്കുകയോ ചെയ്യുന്നതു സാരമായതു കുറ്റമാക്കുകയും ഉണ്ടാക്കിയതോ കൈവശം വെച്ചതോ. നിയമാനുസൃതമായിതന്നെയെന്നു തെളിയിക്കുന്നതിനുള്ള ഭാരം വല്ല പെടിപ്പൊട്ടൽ സാധനവും ഉണ്ടാക്കുകയോ കൈവശം വെക്കുകയോ ചെയ്യുന്ന ആളുടെമേൽ ചുമത്തുകയും ചെയ്തിരിക്കുന്നു. കുറ്റംചെയ്യുവരെയും ചെയ്വാൻ ഇടയുള്ളവരെയും ഒരുപോലെ ശിക്ഷിപ്പാൻ മതിയാകും വണ്ണവും ഇതിനാൽ നിയമിച്ചിരിക്കുന്നു.

ചില നിയമനടപടികൾ കടന്നാക്രമിക്കപ്പെടാതിരിക്കൽ

സാരോദ്ദേശ വിവരണം.

പെടിപ്പാട്ട സാധനങ്ങൾക്കൊണ്ടു ഇപ്പോഴിടയിൽ ഉണ്ടായ നിസ്സാര കുഴപ്പങ്ങളുടെ അവസ്ഥകളാൽ ആവക നിസ്സാര കുഴപ്പങ്ങൾ ചെയ്യുന്നവരും കുറഞ്ഞരമായ പ്രവൃത്തിചെയ്വാനുള്ള പ്രേരണകളെപ്പറ്റി അതായതു സമയം പ്രസിദ്ധപ്പെടുത്തിയ ചില വർത്തമാനക്കടലാസ്സുകളും തമ്മിൽ വളരെ സംബന്ധമുണ്ടെന്നു കണ്ടിരിക്കുന്നു. ഇപ്പോഴുള്ള നിബന്ധനപ്രകാരം അന്യായം നടത്തുന്നതു ഈ പ്രേരണകളെ പ്രസിദ്ധം ചെയ്യുന്നതു വിരോധിപ്പാൻ മതിയായിട്ടുള്ളതല്ലെന്നു പരിചയംകൊണ്ടു അറിഞ്ഞിരിക്കുന്നു. ഒരു വർത്തമാനക്കടലാസ്സിന്റെ സംഗതിയിൽ അച്ചടിക്കുന്നവനും പ്രസിദ്ധം ചെയ്യുന്നവനും ആയി രജിസ്റ്റർ ചെയ്യപ്പെട്ട ആളുകളുടെമേൽ സാമാന്യമായി ചുമത്തിയ കാലത്തിനുള്ളിൽ പല പ്രാവശ്യവും അന്വേഷണം നടത്തുകയും അവരെ ശിക്ഷിക്കയും ചെയ്തിരിക്കുന്നുവെങ്കിലും ഈ വിധപ്രവൃത്തി യഥാർത്ഥത്തിൽ പ്രേരണം ചെയ്യുവർ ഇന്നവരാണെന്നു വെളിയിൽ പറയാതെ മറഞ്ഞുനടക്കുന്നു. ഈ വർത്തമാനക്കടലാസ്സിനെമേൽ ഇങ്ങിനെ അന്യായങ്ങൾ നടത്തീട്ടും അതു നിലനിന്നുകൊണ്ടിരിക്കുകയും കുറഞ്ഞരമായ പ്രവൃത്തി അതു ചെയ്യുന്നതിനിടയാക്കുകയും ചെയ്യുന്നു. ഇതു ഈ നടത്തിപ്പുള്ള ഒരു ഏക ദൃഷ്ടാന്തമല്ലിതു താനും.

അതുകൊണ്ടു വർത്തമാനക്കടലാസ്സുകളിൽക്കണ്ടിനെയുള്ള പ്രേരണങ്ങളെ വിരോധിപ്പാനായിട്ടധികം നല്ല നിയമം ഉണ്ടാക്കുവാൻ ആവശ്യമായി വന്നിരിക്കുന്നു. ഈ ബില്ലു കൊണ്ടുവരുന്നതു 1908 ലെ ഇന്ത്യൻ വെടിപ്പൊട്ടു സാധന ആക്ട്പ്രകാരമുള്ള കുറ്റങ്ങൾ ചെയ്തുകൂടാത്തവയായ ക്രിയകളും ചെയ്യുന്നതിനുള്ള പ്രേരിപ്പിക്കുന്നതിനും മാത്രമേ സംബന്ധിച്ചിട്ടുള്ളൂ. ആവക സംഗതികളിൽ വർത്തമാനക്കടലാസ്സ് അച്ചടിക്കുന്നതിനുപയോഗിച്ചിരുന്ന അച്ചുകൂടം സർക്കാരിലേക്കു പിടിയായി ഭരിക്കുവാനുള്ള ഒരു വ്യവസ്ഥയും ഈ വർത്തമാനക്കടലാസ്സ് ന്യായസ്വന്തം ചെയ്യുന്നതു നിർത്തുവാനും ഇതിനാൽ അധികാരപ്പെടുത്തിയിരിക്കുന്നു.

ഈ ബില്ലിൽ സ്വീകരിക്കപ്പെട്ട നടപടി മറ്റൊരുവന്റെപ്പറ്റി പ്രവൃത്തിപ്പാൻ ക്രിമിനൽ നടപടി നിയമത്തിൽ നിഷ്കർഷിക്കപ്പെട്ട നടപടിയുടെ സാധാരണ രീതിക്കനുസരിച്ചുകാണുന്നു. എന്നാൽ അച്ചുകൂടം അടക്കിയെടുപ്പാൻ കൽപ്പിക്കുന്നതായി മജിസ്ട്രേട്ടിന്റെ ഒടുവിലത്തെ കല്പനയിന്മേൽ പതിനഞ്ചു ദിവസത്തിനുള്ളിൽ ഹൈക്കോടതിക്കു അപ്പീൽ ചെയ്യാവുന്നതാണെന്നുള്ള സാരമായ ഒരു നിർദ്ദേശവുംകൂടി ഈ നിയമത്തോടു ചേർത്തിരിക്കുന്നു. എന്നാൽമാത്രമല്ല ഒരു തരത്തിലും ഗവർണ്മെണ്ടിന്റെ അപേക്ഷയിന്മേലല്ലാതെ ഒരു അച്ചുകൂടത്തിന്റെ സംഗതിയിൽ യാതൊരു നടപടിയും എടുത്തുകൂടെന്നും നിയമിച്ചിരിക്കുന്നു.

അടക്കിയെടുക്കാനുള്ള ഒരു കല്പന കൊടുത്തിരിക്കുമ്പോൾ അവരെ സംഗതിയിൽ മാത്രം അച്ചുകൂടവും പുസ്തക രജിസ്റ്ററും വക 1867 ലെ ആക്ട്പ്രകാരം ഒരു വർത്തമാനക്കടലാസ്സ് അച്ചടിക്കുന്നവനും പ്രസിദ്ധപ്പെടുത്തുന്നവനും കൊടുത്തിരിക്കുന്ന അധികാരപ്പെടുത്തലിനെ ഉണ്ടാക്കുവാൻ തന്റെ ഗവർണ്മെണ്ടിനു അധികാരപ്പെടുത്തിയിരിക്കുന്നു. അങ്ങിനെ ഉണ്ടാക്കപ്പെടുത്തിയിരുന്നതിനു ശേഷം ആ വർത്തമാനക്കടലാസ്സോ സാരാംശത്തിൽ

ആയ പോലെ തന്നെയുള്ള മറെറാന്നോ നിബന്ധന ലംഘനം കൂടാതെ പ്രസിദ്ധപ്പെടുത്തുവാൻ പാടുള്ളതും അല്ല.

എന്നാൽ ഈ ബിൽപ്രകാരം നടത്തുന്ന യാതൊരു നടപടിയും മറെറാരു നിബന്ധനപ്രകാരവും ഒരു കുറവായിത്തീരുന്ന വല്ല ക്രിയയും ചെയ്തതായോ ചെയ്യുവാൻ തക്കതായോ അനുമാനം നടത്തുന്നതിനു തടസ്ഥമായിവരുന്നതും അല്ല.
